Page’s Patent Pump and Sprinkler.

This is a new, simple and very valuable invention, and combines most of the advantages of a Watering Pot or a Light Force Pump and a Garden Engine, and far surpasses the old style green house syringes. It can be operated by any one, and a lady can syringe her house plants without fear of damaging to either furniture or carpets. The finest spray or the heaviest stream can be thrown, at the operator’s pleasure. We have accepted the agency for it; and they can be obtained at our store for $5 each for tin, and $10 each for brass.

Fire Proof. Fire and Burglar Proof and Burglar Proof Safes, is the most reliable "SAVINGS" Institution in the World.

Every Court House, Public and Private Offices in the United States.

With rare exceptions, is liable any night to be entered by Burglars and rifled of its funds or consumed by fire, together with its valuable contents. Many would suffer less by the loss of their stock of Merchandise uninsured, than by the destruction of their books and papers. Yet, they annually pay large sums for insurance on the former, but save the expense, although required only once in a lifetime, of insuring the latter.

A little reflection must convince such that they are not following the true dictates of economy.
